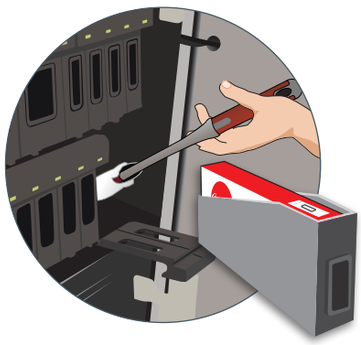
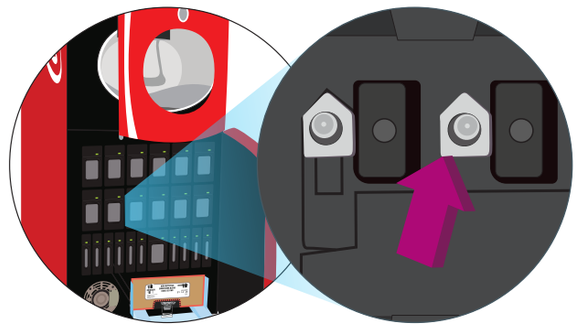
Cleaning Best Practices

EVERY TIME AN INGREDIENT IS REPLACED

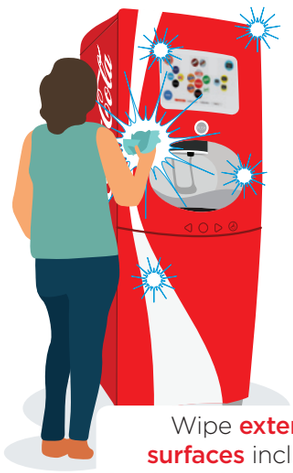


When replacing **ingredient cartridges,** wipe **cartridge slots** or use cartridge slot cleaning tool.

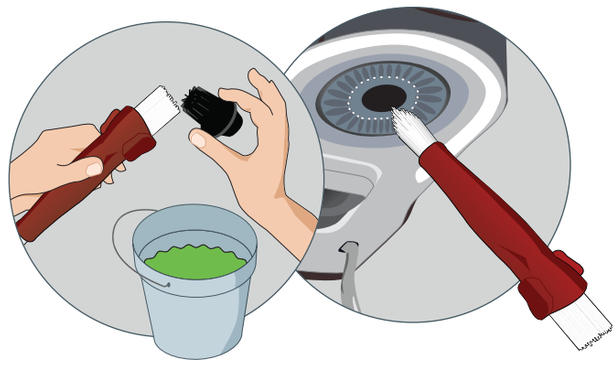


Clean **cartridge probes** until the cloth comes away clean. Repeat. Then allow to air dry for 2 minutes.

EVERY DAY



Wipe **exterior surfaces** including **backspash and cup rest.**



Remove nozzle and clean. **Soak nozzle in sanitizer solution** for no more than 5 minutes. **Scrub injector ring with sanitizer** and brush, then repeat. Allow to air dry for 2 minutes.

Wash **drip tray** and scrub **dispenser drain.**

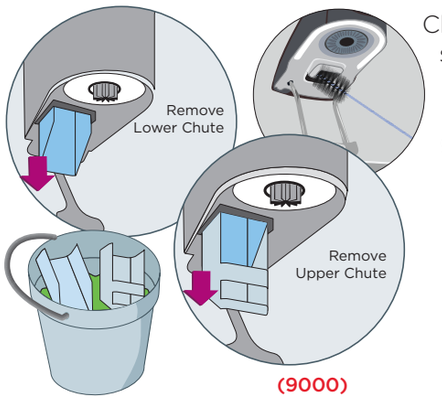
EVERY WEEK



(9000)

Clean, then sanitize inside **the ice chute** with food grade sanitizer.

Remove upper and **lower ice chute** inserts. Clean, then soak in sanitizer for two minutes. Air dry then reinstall ice chute inserts.

EVERY MONTH

Power off dispenser. Remove ice bin lid and thoroughly clean then sanitize **the ice bin.**
